DRYTAC

Interlam Pro - Aqueous Acrylic Pressure Sensitive Overlaminating Films

Interlam Pro is an innovative new range of over-laminating film that incorporates a new generation of aqueous acrylic pressure sensitive adhesive suitable for both external and internal use. Unlike solvent adhesives which are traditionally used for outdoor graphics, our unique formula contains no VOCs and is therefore less harmful to the environment, whilst also providing excellent resistance to UV and outstanding durability in all weather conditions.

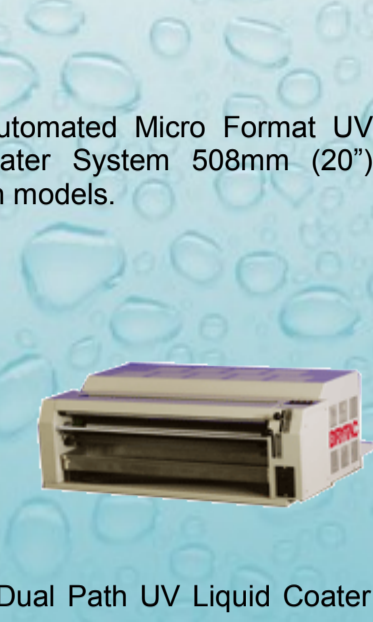

DRYTAC Experts in Finishing Solutions.....

Interlam BioMatt

BIO-DEGRADABLE MATT OVERLAMINATING FILM

Interlam BioMatt is a 50 micron (2.0 mil) bio-degradable matt overlaminating film. Coated on one side with a pressure sensitive aqueous acrylic release liner, one side being siliconised for easy release. The film is fully bio-degradable after use and can be disposed of in the normal waste channels. This film is available in a variety of sizes. Click here for more information.

Samples are available for most of our products so please feel free to call or email us to make a sample request!

Liquid Finishing Solutions

Drytac are proud to introduce a new generation of Liquid Finishing Solutions! This innovative new range of advanced coating systems provide a finishing solution for virtually any printing application in the wide-format, fine art/giclee, fleet marketing, banner, on-demand, or photography markets. Due to its innovative filtered recirculation system, liquid coaters produce virtually no waste and therefore have less impact on the environment than traditional finishing solutions. To request a sample click [here](#).

PressMate UV, Fully Automated Micro Format UV Coater and Primer Coater System 508mm (20") format/single or dual path models.

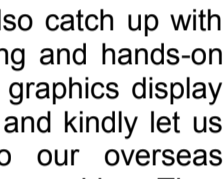

PhotoCoater, Sheet Fed Roller Coater Series, 457mm (18") & 610mm (24") formats.

PhotoMate UV, Texturing Dual Path UV Liquid Coater 430mm (17")/610mm (24")/915mm (36") formats. Click [here](#) for more info.

Our new range consists of VersaCoater **DocuMate**, the smallest UV Liquid Coater in the world 305mm (12") format. Click [here](#) for more info.

NEWS

Drytac Bristol Host Liquid Training Seminar

Drytac Bristol experienced an exciting new start to 2009 for the liquid laminating range. Liquid Laminating Guru Jim Tatum hosted our 3 Day Liquid Training Seminar, which took place on 19th-21st January at our on site training facilities in Bristol, UK. The seminar was a great success and was extremely well attended by various distributors from across the world, including [Jet Media](#) from Poland, [Unistik](#) from Italy, [Grafic Solution Team](#) from Denmark, [Printemat](#) from Belgium, [Sabic Innovative Plastics](#) from The Netherlands, and [Andertans](#) in the UK.

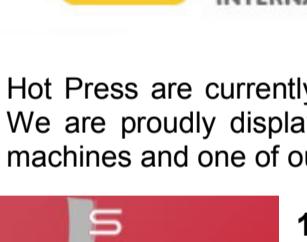

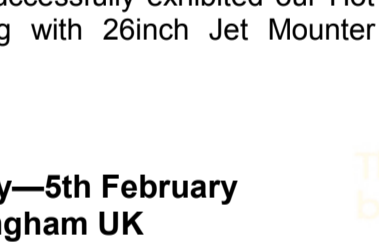

It is always lovely to meet new overseas distributors and also catch up with old faces. The seminar consisted of both theoretical learning and hands-on demonstrations, including a morning spent in Cardiff at the graphics display company [A.C.T.](#) who have one of our XL Machines onsite, and kindly let us use it. The hands-on experience proved invaluable to our overseas distributors and gave them first hand experience with every machine. They were also able to create their own samples from different machines & finishes, to take back and offer potential customers.

One of our attendees said "It was a good opportunity for us to learn about your new Drytac Liquid Coaters. Jim hosted the seminars wonderfully. I was very enthusiastic after seeing the PhotoMate and DocuMate some months ago at Photokina, and now after this week I am enthusiastic about the whole range!"
A big thank you to Jim Tatum for all his hard work over the past 2 weeks, and also to [ACT](#) for their hospitality.

International Training Schools

Jet Media, our distributors in Poland, have been running monthly training schools once a month, with a different focus each month. Some months have focused on Drytac products for the wide format,

Hot Press products and on our liquid laminating range.

Click to find more information on Jet Media [Drytac](#) and [Hot Press](#) Training Schools

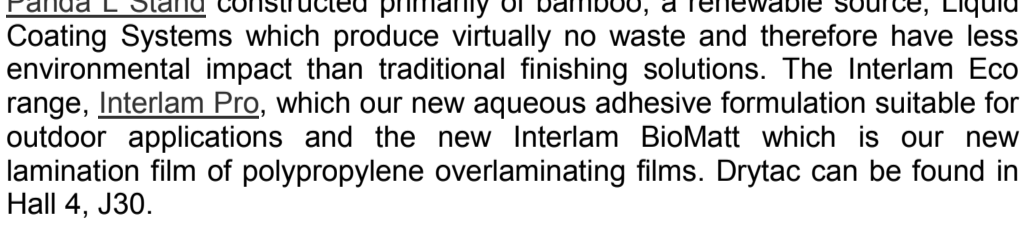

[Camj](#), in Belgium have also taken this initiative, and hosted a two-day seminar in their training facilities. Day one concentrated on the Hot Glass Vacuum Press and day two focused on our JetMounter™ range of roller laminators.

One of our attendees said "Both workshops were great and our customers were very happy!" "Those who had never used a Hot Glass Vacuum Press or any laminator before, the opportunities these machines offer to improve their business and increase their product range. Others found how to use their machines in a more beneficial way."
Experience has taught us that training schools are one of the most effective ways of helping our distributors increase sales and our end users to discover new ways to use our machines and products, to increase their profitability. For more information on how to run your own training school, contact [Emma Johnson](#), or to attend one of our in-house training schools click here to download an application form for [Drytac](#) or [Hot Press](#).

EVENTS

Trade Shows 2009

Drytac Hot Press will be exhibiting at several key trade shows this year. Please feel free to use this as an opportunity to come and see us with any questions you may have, gain new ideas for applications or just see what's new!

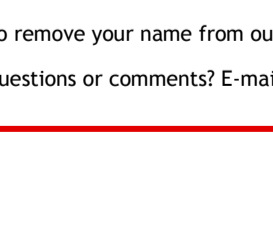

Starting off the year in Las Vegas, Hot Press successfully exhibited our Hot Glass Vacuum Press 110, 220 & 360, along with 26inch Jet Mounter Laminator.

31st January—5th February
NEC, Birmingham UK

Hot Press are currently exhibiting in Hall 12 (Art & Wall Décor), Stand E37. We are proudly displaying our Hot Glass Vacuum Press, two of our Jm26 machines and one of our JM54 SHA machines with regular demonstrations.

19th—22nd February
Bologna Fiera, Italy

This year we will be supporting our Italian distributor, Farné in Hall 36, Booth A44. Demonstrations will be ongoing everyday on our 26inch JetMounters™, and Hot Glass Vacuum Press. To make an appointment please email: emmajohnson@drytac.com

22nd February—25th February
NEC, Birmingham UK

Hot Press can be found in Hall 9, Stand 12, showing our Hot Glass Vacuum Press, JM26 and JM54 SHA machines again with regular demonstrations throughout the show.

23rd—30th April
NEC, Birmingham UK

Drytac will be showing our newest product in our liquid laminating range, the new VersaCoater UV XL 80inch machine, offering the first opportunity to see this versatile roller coater in action.

Included on our stand will be the new AFC 1600mm (60inch) our water based and solvent system flood coater, along with Interlam Pro; our innovative new range of over laminating aqueous acrylic pressure sensitive film. For your first chance to see the XL in live demonstrations visit the Drytac stand in Hall 7, C28.

12th—14th May
Amsterdam

At this years FESPA Digital Europe, Drytac will be focussing on our 'Green' products, including our Eco-Friendly Retractable [Bamboo Banner Stand & Panda L Stand](#) constructed primarily of bamboo, a renewable source, Liquid Coating Systems which produce virtually no waste and therefore have less environmental impact than traditional finishing solutions. The Interlam Eco range, [Interlam Pro](#), which our new aqueous adhesive formulation suitable for outdoor applications and the new Interlam BioMatt which is our new lamination film of polypropylene overlaminating films. Drytac can be found in Hall 4, J30.
