

BAMBOO DISPLAYS

Display products constructed of up to 95% Bamboo

The **Panda Stand™** retractable, the I-framed **Panda L Stand™** and the accompanying literature stands are all constructed of up to 95% bamboo, a fast-growing, renewable resource that has recently become a preferred material for greener building and manufacturing.

This group of display products have an elegant look and allow you to make an environmentally friendlier choice than traditional metal displays. An additional bonus of bamboo construction—it's lightweight. None of these units weigh over 6.8 kg!

What makes bamboo eco-friendly?

- Fastest growing plant on earth with increasing use as a versatile industrial material.
- Rapid maturity cycle of 3-4 years with the viability to replace wood or metal components.
- Provides a critical component in the balance of oxygen and carbon dioxide in the atmosphere.
- The variety of bamboo used in this product is plantation grown and not part of the Giant Panda's diet.

Drytac Earth-Friendly™

Check out the whole family of Panda™ Products including literature stands. Product specifications on back of this sheet.

New top rail design on both models allow the graphic to be attached by banner tape or with a 25mm (1 inch) pole pocket.

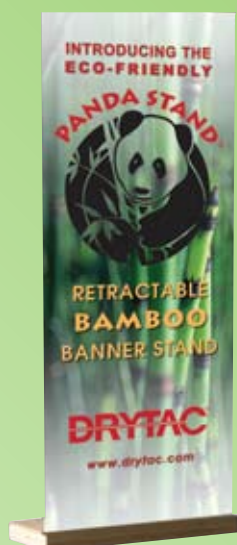

Complete these stands with our environmentally friendly print media, BioFab or BioFab Blackout!
