

# Interlam Eco

## Pressure Sensitive Overlaminating Films

Our Interlam Eco series of overlaminating films not only offer superior performance at a moderate cost, but are also less harmful to the environment than other similar products of its kind.

Its unique characteristics include....

- Polypropylene base films, which, in addition to their innate functional benefits, do not contain PVCs.
- The films are coated with an aqueous based acrylic adhesive which utilises H<sub>2</sub>O rather than a solvent to disperse the acrylic adhesive particles.
- A relatively thin paper-based release liner, coated only on one side with a moisture barrier which does not impede performance. This practice facilitates disposal (less volume) as well as recycling and/or decomposition of the release paper.
- The cores and boxes are made of 70%+ recycled paper.
- Available finishes include EcoGloss, EcoTex and EcoLustre.

To find out more about our more environmentally aware products which can be identified with the green umbrella symbol shown above, visit our website on [http://www.drytac.co.uk/green\\_umbrella\\_products.htm](http://www.drytac.co.uk/green_umbrella_products.htm)

## Interlam EcoGloss™ UV 65μ

### Economical high volume overlaminating film

Interlam EcoGloss™ is particularly suitable for laminating and encapsulating high volume offset printing, blueprints, plain paper copies and other output for POS displays, menu boards, supermarket signage and other graphics where cost is a key factor.

CODE	SIZE
IEG41328	1040mm X 100m
IEG51328	1300mm x 100m
IEG55328	1400mm x 100m

## Interlam EcoLustre™ UV 105μ

### Lustre finish pressure sensitive overlaminating film for direct lighting conditions

The low glare surface of this 105μ film is excellent for displaying graphics under direct-lighting environments. It provides low surface sheen without loss of contrast or sharpness. Effective for photographic prints, POS displays, promotional displays, event signage and other display applications.

CODE	SIZE
IEL41328	1040mm X 100m
IEL51328	1300mm x 100m
IEL55328	1400mm x 100m

## Interlam EcoTex™ UV 165μ

### Scuff-resistant satin finish pressure sensitive overlaminating film

Interlam EcoTex™ is particularly suitable for laminating and encapsulating trade show and banner stand graphics, signage displayed in high-traffic areas, counter mats, placemats and other graphics where a scuff-resistant finish is required and cost is a key factor. Due to its dimensional stability, EcoTex is also ideal for one sided laminators.
